

WHAT TO DO AFTER COVID-19 TESTING

1. QUARANTINE AFTER TESTING

You must self-quarantine until your results have been determined. If you have been tested, it is because our providers have determined you have an increased risk of the illness.

- a. If symptoms worsen, *call an emergency room or your local health department to determine if you need additional attention.*

NOTE: PLEASE DO NOT WALK IN TO AN URGENT CARE, HOSPITAL, OR OTHER HEALTH CARE PROVIDER BEFORE CALLING.

2. GET YOUR RESULTS

At the time of your screening, a telehealth appointment will be scheduled for you to receive your results. You will also receive confirmation of your results via text message.

- a. *Depending on when we receive your results, your follow-up appointment may be rescheduled.*
- b. Additional instructions will be provided at your follow-up based on your results.

3. REPORT TO THE STATE DEPARTMENT OF HEALTH

Our lab partner, Quest Diagnostics, will report any positive findings to the State Department of Health and CDC. If you have tested positive for COVID-19, the local health department will also follow up with you.
