

Testimonials

I joined MEC in April 2019. The work environment is amazing. Even though it is fast-paced and dynamic, there is a sense of family and belonging that you will not find at any other company. Everyone's opinion is valued equally, no matter if you work here as maintenance staff member or a physician. The CEOs go above and beyond to ensure that employees maintain a healthy life-work balance.

I personally cannot thank MEC enough, they have been vital in ensuring the success of my career. I hope to be a part of the MEC family for many years to come.

PHYSICIAN

Working at Midwest express clinic has been an amazing journey and a great experience. MEC provides me with the opportunity to manage patients in an acute urgent care setting in addition to providing primary care services. I have developed close and trusting relationships with many of my urgent care patients who have remained under my care for their primary care needs. We are a close knit family who respect and support each other. The providers work as a team and are involved in providing each other with guidance and support in order to provide the best care for our patients. The management is very accessible, generous and always open to discussing new ideas and ways to better our services. I consider myself very fortunate to be a part of the MEC team.
